

## Technical Data Sheet

# LactoCorn

### INCI

Zea Mays (Corn) Seed Flour ( and ) Lactobacillus Ferment (and) Propylene Glycol (and) Phenoxyethanol (and) Methylparaben

### 产品介绍

LactoCorn is a kind of fermented product which is fermented by corn and lactobacillus. It contains a variety of effective components of corn, including a large number of lecithin, linoleic acid, fiber, vitamins and starch granule. Starch granules can adsorb grease, will not harm the skin. It can gently remove dirt and dust on the skin, keep skin clean and refreshing. At the same time, it can reduce the sensitivity of the skin.

Probiotic lactobacilli have been in use for several decades. It can promote cell division and enhance the immunity of human body. After fermentation, macromolecular decomposed into small molecules, It can replenish enough nutrition and moisture to the skin, and improve the skin appearance of lack of water. It can also contract the pores effectively, and improve the excretion condition of the oily matter, keeping your skin delicate and smooth.

### Product function

- Remove grease
- Shrinkage of enlarged pores
- Smooth the skin
- Natural Face and Body Scrub

### Product standard

Index	Standard
Appearance	Pale yellow turbid liquid (Contains corn seed powder)
Odour	Slight characteristic odour
pH	5.0 – 7.0
Solid content	5.0-8.0%
Total number of bacteria	≤ 500CFU/ml

---

The number of mold and yeast	≤ 100CFU/ml
Fecal coliform	Not detectable
Staphylococcus aureus	Not detectable
Pseudomonas aeruginosa	Not detectable
Heavy metal	≤ 10ppm

---

### Recommended Usage

5.0%~60.0%

### Recommendation

Shake well before use , Added to the aqueous phase , Below 60 °C

**solubility:** water-solubility

### Package and Storage

It should be stored in airtight package and at room temperature.

20 kg/barrel, specifications can be customized. 1 years Storage term.
